Implementation Plan

Automation of the Veeder Root is an option and **not** mandatory and requires purchase of fax modem card and designated analog phone line. Because you have weeks between deliveries it is not necessary to automate your tank. We can simply get data from you once or twice a week and we can create your tank profile that way, avoiding any additional costs.

Your customized 24/7 Tank Compliance System will still be available for you either way.

Additional key steps involved in the implementation process include the following:

- Optional Communication(existing Ethernet, phone line)
- Accounting/payables integration

Pricing

Option 1: Fuel Management Fee

i.i. Fuels will charge CGG a fixed per gallon management fee of \$.015 for all services described in this proposal per CSU San Bernardino Fuel Management Contract #SBCMP0000045270. Executive Overview

i.i. Fuels, Inc. is pleased to present this proposal to City of Garden Grove (CGG) to be your fuel champion. Whether we can automate your current Veeder Root TLS System for communication or not, CGG has a slow moving tank so that refill data can be collected manually and all of our cost savings programs can still be maximized.

CGG purchases approximately 216,000 gallons of bulk fuel a year. Fuel is purchased on demand or just-in-time; that is, when the tanks reach a certain level. No Fuel Market positioning is considered when placing refill orders.

CGG's current situation is characterized by:

- Higher than desired fuel costs and operating expenditures
- Traditional fuel purchasing practices

i.i. Fuels - Proposed Goals

- Reduce Total Fuel Expenditures

As part of our proposed program i.i. Fuels will implement cost savings measures across the entire fuel supply chain.

- Improve operational efficiencies

By outsourcing fuel procurement and management to i.i. Fuels, CGG will gain access to industry best practices and technology solutions that increase efficiencies. For example, i.i. Fuels will handle all fuel refill decisions, selecting the optimal Fuel Market timing and price for each load.

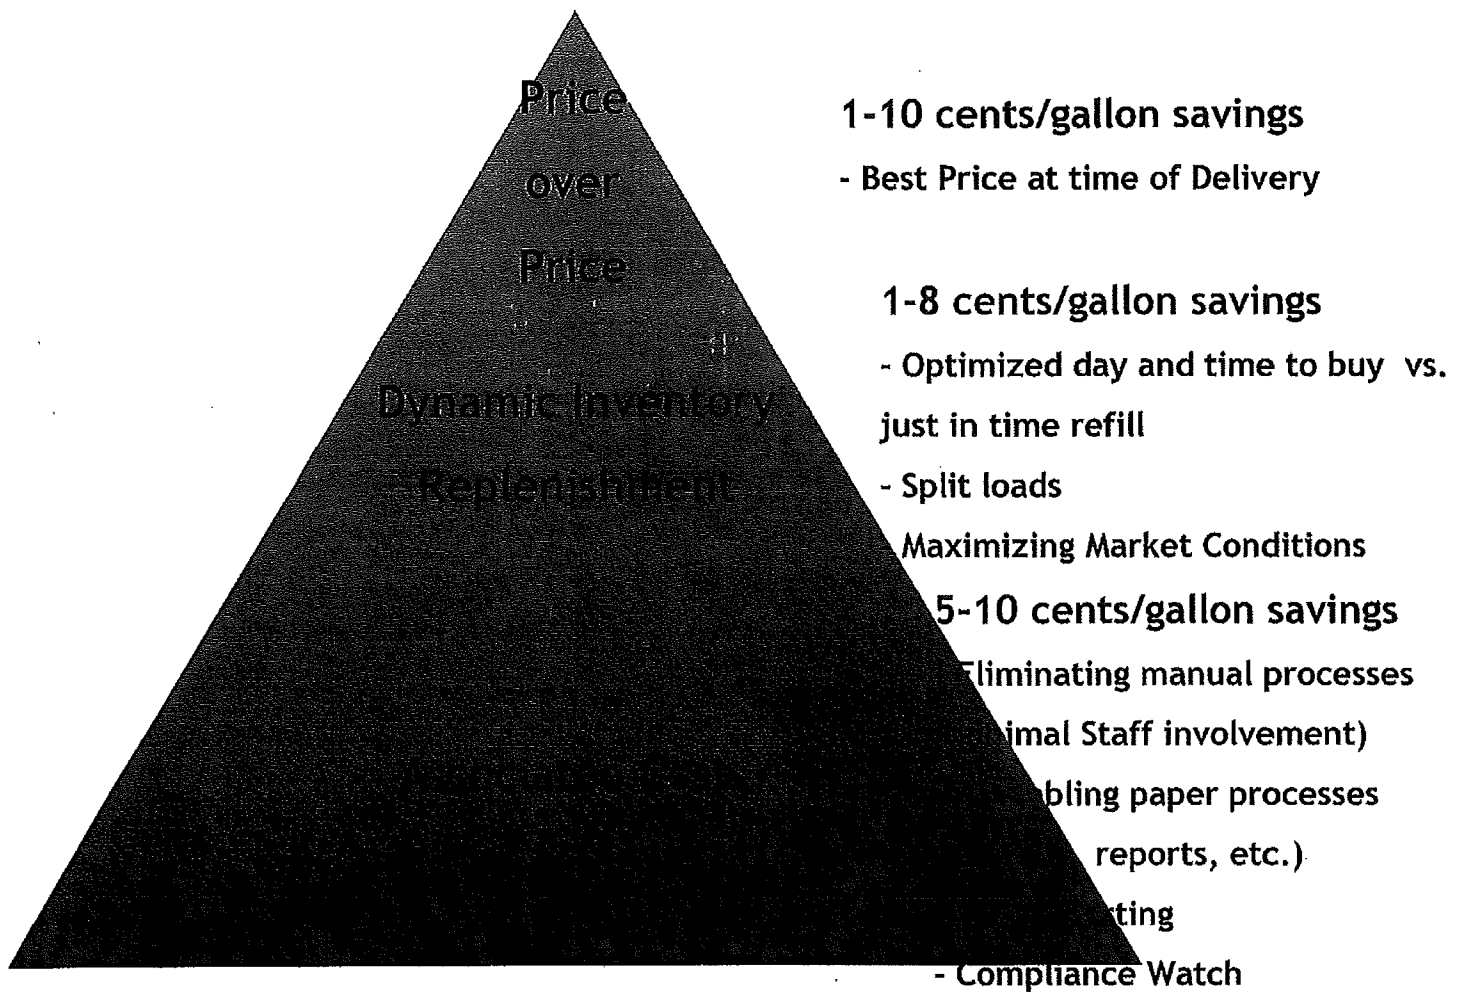

- Increase control over documentation of environmental requirements

Given the potential liability if a site is not adequately prepared for an EPA inspection, i.i. Fuels offers an exceptional environmental support program, which includes tank monitoring(where available), electronic documentation of alarms and corrective actions and consolidated data capture through a secure Web interface. All tank testing documentation is stored electronically and can be accessed through a password protected web site 24/7. i.i. Fuels will also schedule and perform all testing so that no testing is ever late.

- Seek innovation in purchasing and managing fuel

As an innovator in the industry, i.i. Fuels is continually exploring new ways of reducing costs throughout the supply chain.

In summary, i.i. Fuels is a one-of-a-kind, revolutionary fusion of fuel industry expertise, cutting-edge innovation, and exceptional client care make us the right fuel partner for CGG.

These standards of excellence have achieved savings for our clients of 15%-25% on their bottom line.

Proposed Fuel Outsourcing Solution

Optimizing Fuel Procurement

Making the Refill Decision

Currently, the decision to purchase fuel is based on demand or just-in-time; that is, when a tank reaches a certain inventory level. Based on an extensive audit of invoices and conversations with CGG, there is an opportunity to optimize fuel buying through modifying the buying schedule to take advantage of price fluctuations in the market. We have found that our clients lose market leverage when they order fuel based on inventory levels alone.

Our online tank monitoring system enables i.i. Fuels to make smarter refill decisions by monitoring fuel prices and evaluating short-term market trends, forecasting demand based on your historic usage patterns, then determining the optimum day and time to buy your fuel. Our Dynamic Inventory Replenishment process results in reduced fuel costs as compared to your historical purchasing pattern - buying based on a specific tank level.

Performance benchmarks include:

- Reduced fuel costs through:
 - Improved market timing
 - Improved inventory management

Streamlining Operations

Tax Reporting

The process of collecting the information needed to generate the fuel tax returns is paper and time intensive. i.i. Fuels can support collection of the information needed to manage tax reporting, reducing the time your organization spends on this activity. This results in increased reporting accuracy.

Performance benchmarks include:

- Significant reduction in time spent in preparing tax reporting documentation
- Increase in reporting accuracy

Regulatory Compliance and Reporting

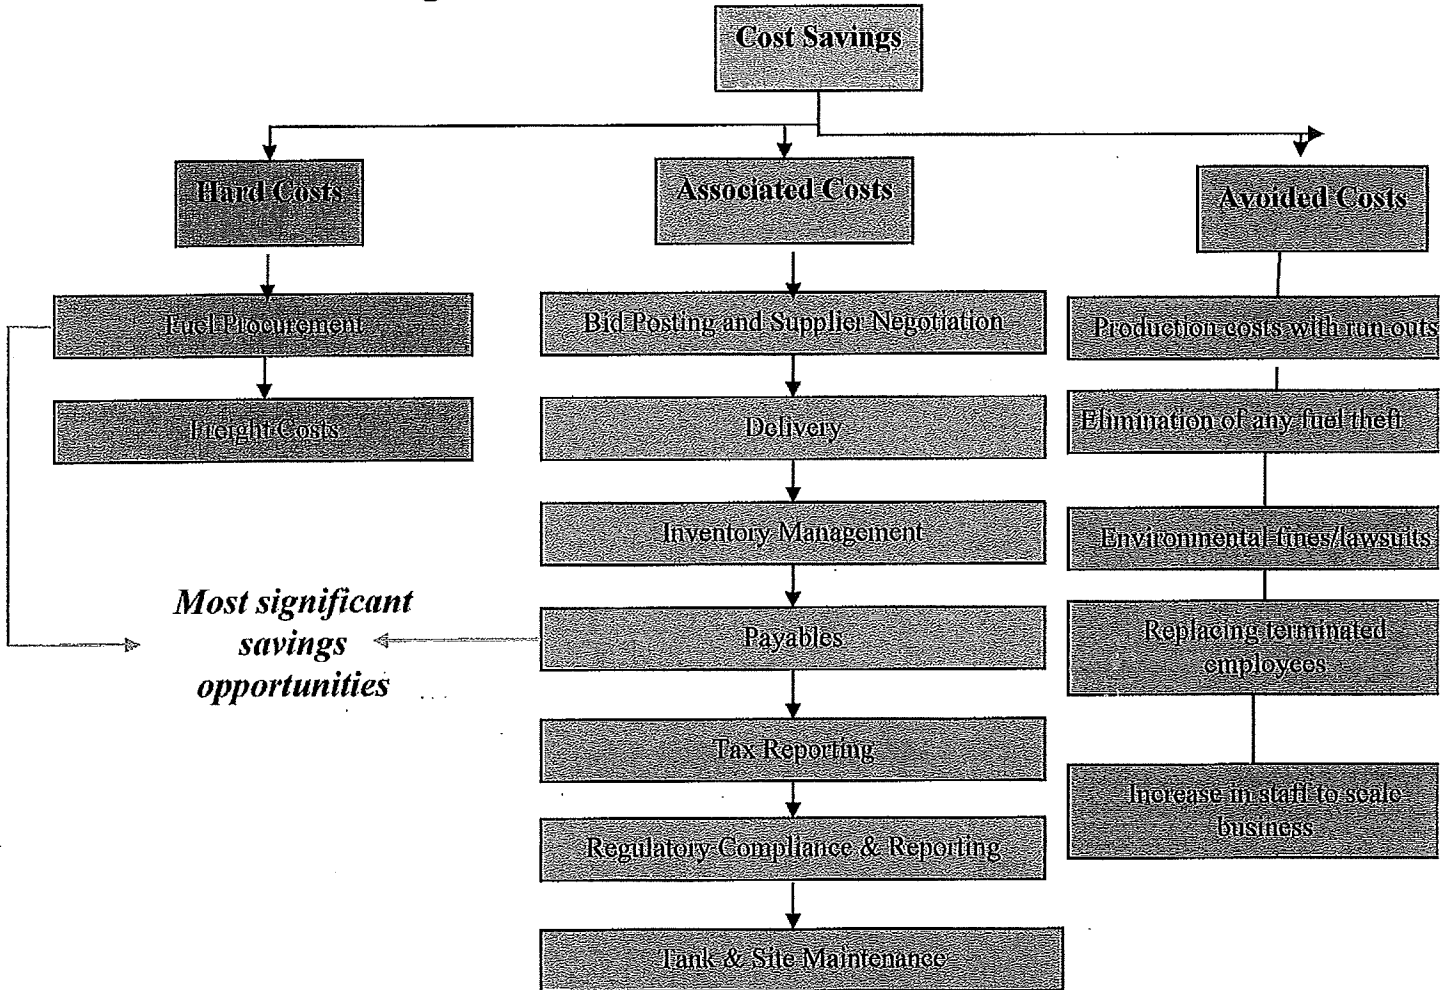

California has strict regulations regarding testing for above and below ground tanks. This is a concern for any agency, given the potential liability if a site is not adequately prepared for an EPA inspection. i.i. Fuels offers an exceptional environmental support program. We will help you set priorities for record keeping and data tracking, on a site-by-site basis. We also will electronically document safety procedures, tank monitor alarms and any corrective actions. Then, our multi-function Web interface will consolidate this information with all of your other fuel activity, delivering all your critical data to your desktop.

i.i. Fuels will document, schedule and perform all tank testing requirements.

Performance benchmarks include:

- Elimination of time involved in:
 - Manual documentation of required tests and corrective action
 - Manual documentation of corporate safety requirements
 - Scheduling all testing requirements
 - Increase in efficiency by viewing the total fuel picture through a single Web interface
